

Michael Lunn

“We believe that a transition to sustainability is necessary, inevitable, possible, and a source of both great new opportunity and long-lasting prosperity, and we dedicate our best efforts to making sustainability happen.”

- AtKisson Inc Mission Statement

About Michael Lunn

Michael Lunn is Lead Associate to sustainability consulting company AtKisson Inc which is a leading international consulting and training firm dedicated to accelerating progress toward sustainability with offices in Australia, US, UK and Asia.

Michael has been working in the environment and sustainability field since 1986. Prior to establishing his own business in 2000 and joining the AtKisson network, Michael worked for the Queensland State government, assisting local government and business to integrate sustainability through existing systems. Michael's recent clients (past 12 months) have included Victorian State Government, Bendigo Bank, Brisbane City Council, Brisbane Water, South East Queensland Regional Plan (SEQ2021), Wide Bay ACC, CSIRO, Pine Rivers Shire Council and Griffith University. Many of these are still working with us, in an ongoing capacity.

Michael prides himself on helping business and government to accelerate towards sustainability, and has worked extensively on enhancing organisational performance through sustainability indicators, systems, and change management. Michael is also experienced in Sustainability reporting, and sustainability strategies both in the UK and Australia.

Michael has BSc in Environmental Management, and a Masters degree in Business Administration. He is also a qualified auditor in EMS and ISO14001. Michael was the founder of the UK Sustainability Practitioners Network, which now has over 40,000 members worldwide. He acts as joint editor of WaveFront, an International journal of sustainability news. Michael's main base is in Brisbane, Australia but travels to Europe, US and other parts of the world consulting on sustainability in business and government on a regular basis. He also has a working knowledge of local government, and community service delivery.

About the AtKisson Group

The tools and services used by AtKisson Inc have been proven to be a powerful strategy for accelerating the process of turning sustainability visions and aspirations into practical realities. By accelerating innovation, developing a better understanding of systems, training a dedicated core of sustainability champions, and measuring progress with sustainability indicators, companies, governments and communities can reach their goals faster, and more efficiently.

Sustainable Cities and Regions

A sustainable city meets *all* of its basic needs in a way that can be continued into the long-term future — including its need to continuously improve. The challenge of sustainability requires cities and regions to *integrate* environmental, economic, and social development, and to ensure that every individual has a chance for a successful and satisfying life.

AtKisson tools and processes for sustainable community and regional development are designed to help leaders and citizens from all walks of life **work together** to achieve rapid progress. Using participatory techniques, balanced with technical expertise, communities learn to measure, plan, and act for sustainability. More importantly, they learn to *think* together about what sustainability means for them, and what they can do to make it happen.

Our tools and processes for sustainable community and regional development are designed to help leaders and citizens from all walks of life **work together** to achieve rapid progress.
